INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/EP2004/010883

Box	k No. I	I Basis of the report				
1.		th regard to the language, this report is based on the international licated under this item.	al application in the language in which it was filed, unless otherwise			
	This report is based on translations from the original language into the following language which is the language of a translation furnished for the purposes of: international search (Rule 12.3 and 23.1(b)) publication of the international application (Rule 12.4)					
		international preliminary examination (Rule 55.2 and/o	r 55.3)			
2.	rece	regard to the elements of the international application, this report is based on (replacement sheets which have been furnished to the ving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to eport): the international application as originally filed/furnished the description:				
		pages 1-8	as originally filed/furnished			
		pages*	received by this Authority on			
		pages*	received by this Authority on			
	\boxtimes	the claims:				
		nos. <u>1-5</u>	as originally filed/furnished			
		nos.*	as amended (together with any statement) under Article 19			
		nos.*	received by this Authority on			
		nos.*	received by this Authority on			
	\boxtimes	the drawings:				
		sheets 1/1	as originally filed/furnished			
		sheets*	received by this Authority on			
		sheets*	received by this Authority on			
		a sequence listing and/or any related table(s) – see Supplement	ntal Box Relating to Sequence Listing.			
3.		The amendments have resulted in the cancellation of:				
		the description, pages				
		the claims, nos.	the claims, nos.			
		the drawings, sheets/figs	\neg			
		the sequence listing (specify):				
		any table(s) related to sequence listing (specify):				
4.		This report has been established as if (some of) the amendar they have been considered to go beyond the disclosure as file	nents annexed to this report and listed below had not been made, since d, as indicated in the Supplemental Box (Rule 70.2(c)).			
		the description, pages				
		the claims, nos.				
		the drawings, sheets/figs				
		the sequence listing (specify):				
		any table(s) related to sequence listing (specify):				
*	If ite	tem 4 applies, some or all of those sheets may be marked "super	seded."			

International application No.		
PCT/EP2004/010883		

Box	Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement					
1.	Statement					
	Novelty	(N) Claims	YES			
		Claims 1-3	NO			
	Inventiv	e step (IS) Claims	YES			
		Claims 4, 5				
	Industria	al applicability (IA) Claims1-5	YES			
		Claims				
2.	Citations an	ad explanations (Rule 70.7)				
	1.	The present report makes reference to the				
		following documents:				
		D1: DE 17 75 827 A (GALICHER GEORGES)				
		16 September 1971 (1971-09-16)				
		D2: US-A-5 390 347 (BURI GERHARD ET AL)				
		14 February 1995 (1995-02-14).				
	2.	Document D1 discloses (the references in				
		parentheses are to said document):				
		a planetary gear set comprising a sun wheel (7)				
	connected to the drive shaft (1), a ring					
	gear (9) that can be connected to either the					
	input shaft or the housing, and a planet					
		carrier (15) with planets (8), said planet				
		carrier constituting the output of the				
		planetary gear set.				
		For shifting the gears, a sliding sleeve (17),				
		which rotates with the ring gear, is pushed				
		with its centring diameter (32) onto a centring				
		collar (41) of the input shaft.				
			/			

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

2.1 INDEPENDENT CLAIM 1

Thus, document D1 discloses all the features according to independent claim 1 in combination. The subject matter of said claim therefore lacks novelty (PCT Article 33(2)).

3. DEPENDENT CLAIMS 2-5

Claims 2-5 contain no features which, combined with the features of any claim to which they refer, meet the PCT requirements for novelty and/or inventive step. The centring collar is in the form of a synchronising cone and slows the ring gear before the dogs engage.

In D2 (see figure 1), the sliding sleeve 26 is welded onto the retaining ring (27). Therefore, for a person skilled in the art, the transfer to document D1 of a retaining ring that is welded or snapped on, in order to simplify production of the sliding sleeve, is obvious.
